

FLOWTRONIX (FT)

PPE ESSENTIALS

Founded in 1990, **FLOWTRONIX (FT)** is a leading Manufacturer, Stockiest, Distributor and Supplier of the complete range of high quality Personal Protective Equipment (PPE) and safety solutions. We provide a diverse product portfolio for consolidated safety purchasing to our strategic end user clients, distribute products and services through our largest integrated network of resellers, retail stores and distribution centers.

Personal Protective Equipment (PPE)

FT offers a full range of safety solutions for your professional needs. We offer high quality personal protective equipments which guarantee protection against wide range of risks associated with high degree of comfort for our users. We supply our products to all industrial sectors that need protective equipment for their manpower against all kinds of occupational hazards. FT work towards by implementing a total “Head-to-Toe” safety concept to the HSE standards by providing authentic, environment friendly and quality Personal Protective Equipment.

FT SAFETY FIRST AT EVERY WORKPLACE

Serious injury or death in the workplace changes lives forever - for the families, friends, co-workers, employer and communities. That is why it is very important to apply Safety First philosophy in every workplace. Effective health and safety in your workplace can help keeping your employees happy and productive, at the same time reduces the human and business costs of injuries.

PPE ESSENTIALS

IMPORTANCE OF PPE:

Worksites can present a range of hazards that workers need to be protected from. This is where Personal Protective Equipment (PPE) comes in. PPE is equipment that will protect the user or wearer against any health or safety risks at work. PPE reduces the risk of injury or harm to users caused by hazards present in the workplace.

PPE is used in a wide range of jobs and industries, from the obvious, such as agricultural and building industries to, more surprisingly, catering and lifeguarding. The type of PPE changes according to the user’s working conditions and regulations.

IMPORTANCE OF PPE:

Safety is a major issue for day laborers and skilled laborers. Each year, accidents happen frequently in the construction industry and often times it is due to the absence of Personal Protective Equipment (PPE) or failure to wear the provided PPE.

PPE is equipment that will protect workers against health or safety risks on the job. The purpose is to reduce employee exposure to hazards when engineering and administrative controls are not feasible or effective to reduce these risks to acceptable levels. These hazard risks can be anything from wet floors to falling debris and everything in between.

Using PPE, and wearing it properly, is vital to avoid unnecessary injury in the workplace. Choosing not to wear PPE can be dangerous especially when it could save your life.

WHAT ARE THE BUSINESS BENEFITS OF INVESTING IN PPE?

1. **Avoid and reduce injury and sickness** – PPE reduces the effects of injury and can prevent accidents and injury from happening at all. By lowering these risks, sickness absence is reduced and the headache of paperwork and time involved reporting is avoided.
2. **Fulfill legal health and safety obligations** – avoiding accidents, investigations and prosecutions.
3. **Looking after workers** – Healthy and safe workers are also happy and productive ones. Keeping your staff happy results in increased productivity, higher staff morale, lower staff turnover and reduced sickness absence. Companies that adopt best practice also attract new talent and create brand loyalty by sending a positive image to customers.
4. **Avoid HSE investigations** – by staying compliant, you avoid prosecutions (for the company and its Directors), fines and legal fees, compensation payouts and costs to the business of the associated bad press.
5. **Cost savings** – the money invested in PPE is covered by savings gained from other benefits such as lower staff turnover, a reduction in sickness absence and avoiding costs relating to prosecutions.

Personal protective equipment is essential to safeguard your employees in various industries.

The purpose of personal protective equipment is to protect the body from a various injuries resulting, for example, from mechanical, chemical, electrical and thermal hazards.

Protective equipment should not be worn just at the moment of interacting with industrial hazard, but rather long before employee is going to come into contact with the industrial hazard.

Having the protective equipment in place continually will ensure maximum safety.

SCUTA PPE ESSENTIALS:

- PPE Kit Bag 06
- Trolley Bag 06
- Cooling Hat 07
- Bump Cap 07
- Baseball Cap 08
