DECONTAMINATION SHOWER PORTADEC 1000

PORTAdec 1000 is a Portable Shower used to decontaminate protective clothing, or as a temporary Emergency Shower to wash chemicals from the skin.

- Easily erected and ready for use in just five minutes
- Simple pull rod handle operation activates the overhead shower and lower body jets.
- Disposable fibreglass foot grating ensures the user is not exposed to the contaminated surplus water.

DESCRIPTION

The unit comprises a robust foldaway frame with integral hood, disposable side sheeting and sump and can be erected and ready for use within 2 minutes. The sump incorporates a disposable fibreglass foot grating to ensure the user is not standing in the contaminated wash off water.

The shower system consists of an overhead central shower nozzle with two lower body jets, all operated by a pull rod handle. The water inlet is a quick coupling fitted to 22mm (1") lay flat supply hose, which feeds the shower system.

The PORTAdec 1000 can be connected either directly to a water main or to a Hughes PORTAheater, which can supply two units with warm or hot water simultaneously. For storage purposes this unit is stored in a heavy duty 'hold-all' type valise.
