RAPID PRO SHELTER
35-5 & 35-7

The RP 35 shelter ranges are medium sized rapid deployment shelters in a highly portable and lightweight package. The standard models have multiple entry/exit points with side mesh windows and cover flaps. The shelters can be used for casualty management, surge capacity, temporary accommodation, situation management, or other mobile shelter needs. The shelter is available in two standard lengths RP35-5 & RP35-7. The shelters require four persons for deployment.
