Pockets for knee pads.

2 pockets with water-proof zippers.

Reinforcements on the knees.

Knife pocket on right leg.

Dyneema® is the world's strongest fiber (15 times stronger than steel on a weight for eight basis). This makes it possible to offer high levels of protection against waterjetting hazards even with lightweight fabric. Being much thinner and more flexible than traditional materials, such as leather, cotton and metals, products made with Dyneema® fiber will be very comfortable. Employees will appreciate this comfort, combined with higher protection, and consequently are more likely to wear them at all times.
